

Best Bet for Braces

Clear Aligners

VS.

Full Brackets and Bands

How it Works

A series of 5 – 30 trays are custom-made to gradually change the position of your teeth. Trays are changed every 3 weeks.

A bracket is glued to each tooth and a wire runs through each bracket.

Pros

Trays are practically invisible and removable.

Best for complicated cases. A more exact treatment.

Cons

Will not work well for complicated cases.

Wires and brackets are visible. Decay can be a problem around brackets.

Best For

Anterior crowding where esthetic improvement is required.

Comprehensive treatment where major corrections are necessary.

Cost Estimate

\$2,000+

\$4,000+
